MET RISHIKUL VIDYALAYA PREPARING FOR LIFE

MET Rishikul Vidyalaya, MRV as it is popularly known is based on the principle of preparing one for life's challenges, in short- it is a school that prepares one for life. Started in 2002, the school has come a long way. After adopting the Cambridge way of education in 2012, the centrally located abode of learning in Mumbai gives students a competitive edge to conquer, present and future challenges alike.

Under the guidance of the Trustee Pankaj Bhujbal, and the Principal **Kavita Sanghvi**, MRV constantly strives to equip its students with 21st century skills along with the traditional values.

Quality educators

MRV has a team of dedicated teachers who keep themselves abreast of the developments in the field of education. The teachers attend a vast array of workshops conducted by

Kavita Sanghvi

Cambridge University and British Council in India and around the world, encompassing: online workshops, subject specific Face to Face training events, the International conference of the IGCSE schools, IGCSE workshops, International Pre-School Curriculum online certificate training and much more. For the past two years MRV has been hosting the MISA Cell Meets – a unique opportunity for teachers from International schools to meet and learn from one another.

The school also conducts a number of in-house workshops

on 'Rishikul Togetherness' and 'Workshop Days' for teachers to come together and learn life-skills for greater inner strength. This year MRV teachers will also be trained in the internationally recognised certificate CIDTL – Cambridge International Diploma in Teacher Learning.

Innovative pedagogical practices

MRV adopts a multitude of Experiential Learning (EL), Blooms Taxonomy and Cross Curricular Teaching that drives the pedagogy and methodology of the teaching - learning process. Teachers play the role of facilitators and the onus of learning is placed on the students to mould them into strong, empowered, level headed individuals who will contribute positively to the nation's growth.

Inspirational Mentor

"The school lays emphasis to shift school education from the ICE age [Instruction, Comprehension, Examination] to ACE age [Agility, Capability, Empowerment]. This emphasis on asking interesting questions, checking what we are told, thinking on our feet, designing our own learning, making good use of resources, harnessing imagination, unearthing problems, being bold and trying new things, helps in a variety of teaching methodologies and practices." says Kavita Sanghvi.

With continual excellence in academics and after achieving

great results in primary and secondary Checkpoints and IGCSE exams, the school is also set out to deliver the A and AS (Advanced Supplementary) level courses.

Co-curricular activities

Through sports, yoga and arts, students learn to appreciate and imbibe, the values of discipline, responsibility and creativity.

To make the students 'future ready' MRV has initiated participation in the MUN (Model United Nations) programme, which exposes students to the real world conflicts. This academic year MRV successfully arranged its first MUN conference, RMUN, for its students.

Special Education

Inclusion of differently-abled students into regular curricular activities makes all the students confident. A team of special educators continuously looks after the needs of these students and create better humans every day. Unbiased evaluation and planning of curricular as well as co-curricular activities, to cater to the needs of students at both ends of the learning curve, makes MRV a place, students look forward to come to.

Going Green

MRV Green World, an ongoing process of making compost, recycling and reusing enables all

the students, teachers and parents to directly or indirectly involve their efforts into making the Earth a better place to live. MRV Green World arranges a Green Mela that raises funds by selling green goods, which are given to charity by the school.

Parents and Teachers Accord

The more parents and teachers share relevant information with each other about a student, the better equipped both will be to help that student achieve academically. Keeping this in mind there are a number of opportunities for two-way communication throughout the academic year.

Parent-teacher organisation, Rishikul Teachers Workshop Day (RTWD) includes various self-development workshops wherein parents participate in some of the training programmes. Weekly or monthly folders of student work are sent home for parent review. An excellent counseling team of teachers always work on emotional or psychological problems faced by students. MRV's Pre-primary section begins their Pre-school with mothers and their toddlers with regular communication using technology and meetings to ensure the

smooth functioning of the school curriculum and goals.

Awards

- British Council's International School Award 2014 – 17
- 'The India's School Merit Awards 2016' by Education Today Co.
- MRV is Ranked No.1 in Maharashtra amongst India's Top 10 Montessori'
- Project Search – Award of Honour by Teri – 2015-16
- Teach a Man to Fish – Business Growth Winner Stage 2 - 2016
