

*Addiction...of a different kind*

*As a child...in the science lecture...our teacher taught  
Addictions, which men and women fought  
Some succumb...some die  
Some win and others try*

*But as I transition from twenties to thirties  
I see an addiction...No an epidemic  
Devouring people...their time...their lives  
I see an addiction...No a pandemic*

*Wherever you go...Whatever you do  
Whoever you meet...is not interested in you  
I often, really wonder...what does it do?  
To completely control...empower you*

*'Screen' is the name of the addiction  
Be it of a mobile...or a laptop  
Glued to the screen people are  
Be it of a tablet or of a TV*

*Killing creativity...the power of thinking  
The good old conversation...where did it go!  
Creating diseases...and useless billing  
Wrecking relationships...the marriage and home*

*A cure should be found soon  
Or the day is not far  
That man will be marrying a screen  
Counting the 'candies' and 'stars'*

*Tanaya D. Deo  
Assistant Professor, MET IOM*
