

Mother Nature

*I do always
Admire your Beauty.
But fail to remember -
Your Protection is my Duty.*

*How can I forget?
I am your best creation.
And also the sole reason,
Of leading you towards destruction.*

*The scientific reason for global warming,
Is the excessive level of heat.
Leading to the depletion of flora and fauna,
Because greenery has been replaced by concrete.*

*Today pollution is increasing
At such a fast pace;
That it will surely lead
To the extinction of the human race.*

We have our lives,

Trapped in a cage.
Realise it soon,
Or face her rage.

Start accumulating money,
As you will need to buy air - to inhale
Because carbon will be free,
And oxygen will be for sale.

Forgive me oh nature,
For my ignorance and greed.
It is never too late,
To sow a new seed.

In your presence, my mother
I find my worth!
Which is why I promise you today,
To save planet earth.
